A. Discussion

1. On October 2, 2014, Paul Christoph reviewed information from previous meetings: including an overview of the current NDMS planning scenario of pre-evacuating patients from Louisiana utilizing the NDMS. 24 hour "on call"; staggered arrivals at approximately 1 per ~6 hours; No neonates, psych patients. Patient movement from H-58 to H-18 hours before landfall.
-The NDMS Patient Reception Area (PRA) location has been the Rutherford County/Smyrna Airport the last 2 years, however we were informed by the National Guard that this would change in approximately 6 months back to Berry Field at the Nashville International Airport. However, the Rutherford County/Smyrna airport will still have a critical role as an alternate PRA airport
2. Discussed future tabletop in winter 2015. Group desires approximately 70 paper patients with symptoms resembling real life NDMS scenario. Paul C will get with HHS/JPATS to get 70 patients in JPATS set up for TTX.
3. Discussed ICS organization. Group desires unified command. Paul C will have draft org chart as well as draft IAP for next meeting.
4. Future NDMS Exercises:
 - a. NDMS TT Exercise Fall 2014/Winter2015
Exercise Objectives Discussed: Patient Tracking using JPATS; Communications and Coordination with supporting state/county/local agencies;
 - b. Functional Exercise (Fall 2015) or Spring 2016
 - c. NDMS Full Scale Exercise 4-13-16 or 5-11-16

B. Follow-Up

1. Consider TT Exercise Objectives
2. ICS Organization
3. Review and suggest changes to NDMS Operational Plan.

Paul Christoph
